# **Potato Harvest Progresses**

# **Agricultural Summary**

Temperatures across the state ranged from one to eight degrees below normal for the week. All 24 stations reported some precipitation. Every station is still below normal for precipitation since March 1, so the rain was welcomed. For the week ending September 30, major agricultural activities included caring for livestock, fall soil preparation, planting winter wheat, and harvesting hay, apples, dry beans, onions, sugarbeets, and potatoes.

#### Soil Moisture and Days Suitable for Fieldwork

Topsoil moisture increased to 14% very short, 63% short, 23% adequate, and 0% surplus. Statewide, Idaho farmers had an average of 6.1 days suitable for fieldwork last week.

**Crop Progress Table** 

Percentages	2007	2006	Avg.
Onions Harvested	89	67	73
Field Corn Harvested for Grain	8	15	5
Field Corn Harvested for Silage	83	86	76
Dry Beans Harvested	91	90	87
Alfalfa Hay 4th cutting Harvested	76	82	68

# Field Crop Report

Statewide, the potato harvest is ahead of normal at 48% harvested. Apples are fifty percent harvested. The Nez Perce County extension educator reported the weekend rain halted planting temporarily. Blaine County reported their first snow for the season. Bonneville County reported below freezing temperatures pretty much ended plant growth for the year. The Franklin County extension educator reports that the corn harvest continues with very good yields.

# Livestock, Pasture and Range Report

Range and Pasture conditions improved again, but still show 64% either poor or very poor. Statewide the third cutting of alfalfa hay is 95% complete, while fourth cutting is at 76% complete. Caribou County reports cattle are still out on the range, but some are starting to be gathered because the grass is running short already.

#### **Condition Table**

Percentages	Very Poor	Poor	Fair	Good	Excellent
Potato	2	2	18	72	6
Irr. Water Supply	23	33	33	11	
Range & Pasture	21	43	33	3
